This tool kit from AE Automotive Technology allows for the complete overhaul of the Aisin 5 and 6 speed SL Solenoids.

Apart from incorrect calibration of the 5 speed SL solenoids, the main concern with them is dirt ingress.

The unique opening method is quick and easy. Following on by re-forming the canister prior to Solenoid assembly. Then simply press to close the entire solenoid leaving it as if it had never been apart in the first place.

The tool kit comes complete with video instructions. Very soon you will be fitting clean, working solenoids to your valve body overhaul.

Note: 5 Speed SL solenoids will require VBDAQ for calibration
